

Final sequence diagrams

The following sequence diagrams illustrate the main processes that take place at Ufflupark, our carpark maintenance platform. They highlight how students, staff, admin, the busrider, busched, busboard, storage, and external services interact during key system activities such as authentication, logging, messaging, payments, facility bookings, reviews, notifications, and analytics.

1. Student logs in with their Google account.

2. Studied literature and above table

3. Student creates a new finding

4. Student messages another student

5. Student stress index profile

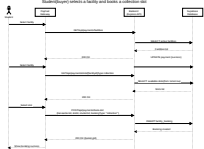

E. Buyer starts payment and harvest

3. Buyer completes PayPal payment

E. Bayes' best collection size

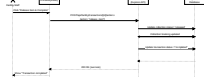

5. Facility staff handling done off

Faculty staff cost

Facility visit notes

13. Student instructions after completion of the activity

12. Administer survey analysis & distribution

13. Administer modulator (tagged corticosteroid)
