Campus Marketplace

MY CONTRIBUTIONS:

My main focus for this sprint was adding the SA data integration feature for when students were creating listings and I also worked on facility dashboard management & unit testing with my members.

SA Data Integration:

Instead of using an API for the data integration, we decided it was best to store the CPI Data for each category in a JSON file that can be referenced by both the backend & frontend. We integrated South African CPI data from Stats SA into the listing creation process. When a facility staff member or user selects a category, the backend maps that category to a CPI category, calculates a suggested price, and stores it in the `suggested_price` field. The json file can be found on `server/src/utils/cpiData.json` and it is used by the frontend at `client/src/pages/CreateListing.jsx`. The Stats SA document we can be found here:

https://www.statssa.gov.za/?page_id=1854&PPN=P0141

Trading Staff Facility Management:

We worked on designing and implementing the facility dashboard which is separate from the student dashboard. I contributed to adding features such as giving the staff a view of facility operations which include booking slots, slots capacity, pending handoffs, transaction progress and recent activity. All these were broken down into React components which can be found at `client/src/components/staff-dashboard`.

Testing:

I also contributed to the frontend and backend testing for all files to ensure that the unit tests were in line with the 60% code coverage requirement.

WHAT WENT WELL:

Me and my team were able to break down tasks adequately and everyone did their part in ensuring that we meet the sprint requirements and

accomplish the user stories, although we faced challenges at some point. I also got a better understanding of our backend system.

CHALLENGES:

I found it quite difficult to handle the facility management as I had to ensure that the purchases were to be booked & collected at the relevant facilities. This meant that a lot of work had to be done backend wise. There were lots of breakages in the APIs and routing but in the end I managed to solve some of the issues. Testing both the frontend and backend and backend was a hassle as we added more and more components to our system.

WHAT TO IMPROVE FOR THE NEXT SPRINT:

For the next sprint, I would improve by making sure my work is more clearly linked to GitHub issues, commits, and user stories. I would also like to document my decisions more consistently so that my contributions are easier to cross-reference during the viva and retrospective marking. Overall, Sprint 3 helped me become more confident in adapting an existing codebase and thinking about software design from both a technical and user perspective.

COMMIT HISTORY:

```
$ git log --author='Nathi006'
commit 4a587013d66eb69ed55d96f92db617530233613e (feature/adminPage)
Author: Nathi006 <khumalogiven08@gmail.com>
Date: Mon May 11 02:28:09 2026 +0200

    Feat: updated the facility management

commit 83d9a097590c0d4f5f83e610ce8789195badb9a5
Author: Nathi006 <khumalogiven08@gmail.com>
Date: Sun May 10 14:40:24 2026 +0200

    Added unit tests for the front end component

commit 7b65e169f7042fdb048554074901cbb88686ecba
Author: Nathi006 <khumalogiven08@gmail.com>
Date: Sun May 10 02:13:37 2026 +0200

    Feat: added facility management
```

```
commit 529fb4cc98ad682690d3e5a185857ec7734bbcd9 (origin/feature/listing, feature/listing)
Author: Nathi006 <khumalogiven08@gmail.com>
Date: Sat May 9 23:14:42 2026 +0200
```

Fixed handling asynchronous code when uploading image

```
commit 386d3a52b0d48727ba1fc26ec0f21513c8da776f
Author: Nathi006 <khumalogiven08@gmail.com>
Date: Sat May 9 23:02:29 2026 +0200
```

Added unit test for data integration:)

```
commit cda4d56d0bc51eda3802efba745316f4e2d6b687
Author: Nathi006 <khumalogiven08@gmail.com>
Date: Sat May 9 22:28:32 2026 +0200
```

modified the CreateListing page

```
commit 32691be48617d769ec093caa9fac947aa9921b11
Author: Nathi006 <khumalogiven08@gmail.com>
Date: Sat May 9 22:08:54 2026 +0200
```

feat: added SA Data Integration

```
commit 6cc19c9d20aed7805758b37848223960bc349c33
Author: Nathi006 <khumalogiven08@gmail.com>
Date: Fri May 8 22:37:17 2026 +0200
```

fix: updated username display & added filter button

```
commit 9e0a3ffe515cec700c4ac6155f11682b1aaf00a6
Merge: de1f63f 2391d32
Author: Nathi006 <khumalogiven08@gmail.com>
Date: Sat Apr 18 21:42:56 2026 +0200
```

Merge branch 'main' into feature/listing
