

2820420:Karabo Tlaka

During this sprint, I focused on improving the staff dashboard because it was not fully meeting the expectations from our previous sprints. My main goal was to make the dashboard more interactive, visually appealing, and easier for users to navigate and read. I redesigned sections of the interface and removed unnecessary features such as the Verification Queue, Marketplace, and My Listings from the sidebar to create a cleaner layout. This helped improve the overall user experience and reduced confusion when using the system. Through this task, I strengthened my React.js frontend development skills and gained a better understanding of creating simple and user-friendly interfaces.

Dev-astators/campus-marketplace Feature/staff dashboard
#43 by Karabocode was merged 3 days ago

pull request for my staff-dashboard page

```
export default function StaffDashboard() {  
  const {  
    activeNav,  
    setActiveNav,  
    viewContent,  
    heroStats,  
    staffProfile,  
    facilityProfile,  
    facilityHours,  
    todaysBookings,  
    totalCapacity,  
    totalBookedSlots,  
    pendingTransactions,  
    fullSlots,  
    transactionQueue,  
    activityLog,  
    advanceTransaction,  
    loading,  
    error,  
    actionLoadingId,  
  }
```

had to change our code structure to use previous pages for interactivity so we can link the ages well
